

Organization of assistance to oncology centers and hospitals in Ukraine.

During the hostilities on the territory of Ukraine, it became quite difficult to carry out full-fledged treatment of cancer patients. Patients need hard-to-reach medications every hour to support their future lives. It is planned to meet the need for treatment of cancer patients as soon as possible and to facilitate their stay in medical institutions.

The purpose of the project:

1. Provision of vital consumer goods;
2. Provision of food (including baby formula and the like), hygiene products, clothing and footwear;
3. Provision of vital medicines, medical devices for life support of patients
4. Ensuring the mental health of patients

Target groups:

1. State, private and international institutions, associations and organizations to ensure the livelihood of cancer patients in Ukraine
2. Ukrainian companies, enterprises for the manufacture of food, baby food, hygiene products, consumer goods, etc.

Project cost:

1. Essentials during hospital stays (bedding, linen, hygiene products, etc.)
2. Long-term food supply
3. Medicines for cancer patients
4. Medical devices for further life of the patient
