

## **Providing the population with critical medicines**

Currently, more and more hospitals need a continuous supply of essential medicines. The population of Ukraine is increasingly experiencing a shortage of emergency medical care. Based on this, it is planned to satisfy as many local and regional medical institutions as possible with daily medicines.

### **The purpose of the project:**

Providing hospitals, medical centers, medical volunteer organizations with vital medicines, etc .;

### **Target groups:**

1. State, private and international institutions, associations and organizations for the provision of medicines in Ukraine;
2. Ukrainian companies, enterprises for the manufacture and distribution of medicines

### **Project cost:**

Antipyretic drugs, analgesics, antiseptics, cardiovascular drugs, sedatives and other necessary pharmaceuticals for hospitals.
